Dear Sir/Madam

**Re.Breakthrough Solution in Recycling Pure water Sachets Waste**

We would like to officially inform your Respected Company that we as a member of GPMA (Ghana Plastic Manufacture Association) have taken the first initiation to solve the Plastic Waste Menace in our society.

We have taken a Giant step by investing US\$3,000,000 and above to purchase a complete recycling plant which comprises of Pre Washing, Washing, Drying, Densifying, Dehumidifying, Extrusion and Pelletizing.

This would be the first of such plant in West Africa with total recycling capacity of minimum 15,000 kilos per day.

Our organization is here to protect you against treats from the metropolitan assemblies and apart from that, we would create huge employment, transform our country to an eco friendly environment and most important protect our future generations from diseases.

Our success lies on you; to support us, we require you to help us collect the waste. Either from your factory or from the streets whether dirty or clean.

By NASWAP & GPMA PAYING HIGH LEVIES to the metropolitan assemblies would not solve this waste menace in our society .All what they would do is transport the plastic waste from the streets to a pumping ground and then burn the waste which is extremely dangerous to our environment.

Do you want the average life of a Ghanaian to reduce by 20 years? This would happen if we continue to burn plastic waste!

We are aware that there are a few companies exporting the plastic waste (pure water sachets), but we cannot rely on them to protect our environment. If for instance, whoever they are exporting decides not to import again, where do we stand then?

Back to square one!

But with us, you are assured as we would be recycling in Ghana and providing employment.

We are prepared to pay you ¢1,200 per Kilo for the waste which we believe is a excellent offer as we would carry out the tedious job of recycling which involves a long process and extremely high cost of production.

We would also provide free door to door collection so that you do not worry about transport expenses.

If you care about your environment & your future generations', we kindly request your office fill out our attached registration form.

Thank you in advance for your support & co-operation

Yours faithfully,

**MR. MANOJ LAKHIANI**  
(Chairman)
